

AMENDMENT TO THE SPECIFICATION:

Please amend the specification as follows:

At page 3, between lines 12-13, add the following paragraph:

-- An example of a plant seed mix according to the instant invention comprises about 90% to about 99.9% by weight of primary seeds for a plant variety with a genetically modified trait. These primary seeds would have the seed coat color that is dominant for the plant variety. The plant seed mix also comprises about 0.1% to about 10% by weight of secondary seeds of the same or different plant variety. Such secondary seeds would have a seed coat color with at least one phenotypical difference from the primary seed coat color. --
